

CK-12 Physical Science Outline

MN Science Standard Aligned

UNIT 1

Scientific Research and Technology 17

- 2.1 Scientific Investigation 18
- 2.2 Science Skills..... 25

Introduction to Matter 45

- 3.1 Properties of Matter..... 46
- 3.2 Types of Matter 53
- 3.3 Changes in Matter..... 61

States of Matter 69

- 4.1 Solids,Liquids,Gases,and Plasmas 70 4.3
- Changes of State..... 83

UNIT 2

Atoms 90

- 5.1 Inside the Atom..... 92
 - 9.2.1.1.1 Describe the relative charges, masses, and locations of the protons, neutrons, and electrons in an atom of an element.**

- 9.2.1.1.4 Explain that isotopes of an element have different numbers of neutrons and that some are unstable and emit particles and/or radiation.**

- 5.2 History of the Atom..... 100

- 9.2.1.1.2 Describe how experimental evidence led Dalton, Rutherford, Thompson, Chadwick and Bohr to develop increasingly accurate models of the atom.**

- 5.3 Modern Atomic Theory..... 107

Periodic Table 113

- 6.1 How Elements Are Organized..... 114

- 9.2.1.1.3 Explain the arrangement of the elements on the Periodic Table, including the relationships among elements in a given column or row.**

- 6.2 Classes of Elements..... 120

- 6.3 Groups of Elements..... 127

End Quarter 1

UNIT 3

Chemical Bonding 135

- 7.1 Introduction to Chemical Bonds 136

- 9.2.1.2.1 Describe the role of valence electrons in the formation of chemical bonds.**

- 7.2 Ionic Bonds..... 141

- 7.3 Covalent Bonds 147

- 7.4 Metallic Bonds 153

Chemical Reactions 159

- 8.1 Introduction to Chemical Reactions..... 160

| | |
|--|-----|
| 9.2.1.2.2 Explain how the rearrangement of atoms in a chemical reaction illustrates the law of conservation of mass. | |
| 8.2 Chemical Equations..... | 165 |
| 9.2.1.2.3 Describe a chemical reaction using words and symbolic equations. | |
| 8.3 Types of Chemical Reactions | 170 |
| 8.4 Chemical Reactions and Energy..... | 178 |
| 9.2.1.2.4 Relate exothermic and endothermic chemical reactions to temperature and energy changes | |

UNIT 4

Electromagnetic Radiation 461

| | |
|--|-----|
| 21.1 Electromagnetic Waves | 462 |
| 9.2.3.2.7 Describe the properties and uses of forms of electromagnetic radiation from radio frequencies through gamma radiation. | |
| 21.2 Properties of Electromagnetic Waves..... | 467 |
| 21.3 The Electromagnetic Spectrum | 471 |

Nuclear Chemistry 239

| | |
|--|-----|
| 11.1 Radioactivity | 240 |
| 9.2.3.2.6 Compare fission and fusion in terms of the reactants, the products and the conversion from matter into energy. | |
| 11.2 Radioactive Decay..... | 246 |
| 11.3 Nuclear Energy | 254 |

UNIT 5

Electricity 508

| | |
|---|-----|
| 23.1 Electric Charge | 509 |
| 9.2.3.2.4 Explain and calculate current, voltage and resistance, and describe energy transfers in simple electric circuits. | |
| 23.2 Electric Current..... | 516 |
| 23.3 Electric Circuits..... | 523 |

Electromagnetism 553

| | |
|---|-----|
| 25.1 Electricity and Magnetism | 554 |
| 9.2.3.2.5 Describe how an electric current produces a magnetic force, and how this interaction is used in motors and electromagnets to produce mechanical energy. | |
| 25.2 Using Electromagnetism | 558 |
| 25.3 Generating and Using Electricity | 564 |

End Quarter 2

UNIT 6

Motion

| | |
|-----------------------------------|-----|
| 12.1 Distance and Direction | 264 |
| 12.2 Speed and Velocity | 269 |
| 12.3 Acceleration..... | 275 |

Forces

| | |
|---|-----|
| 13.1 What is Force?..... | 282 |
| 9.2.2.2 Explain and calculate the acceleration of an object subjected to a set of forces in one dimension ($F=ma$). | |

| | |
|---|-----|
| 13.2 Friction | 287 |
| 13.3 Gravity..... | 295 |
| 9.2.2.4 Use Newton’s universal law of gravitation to describe and calculate the attraction between massive objects based on the distance between them. | |
| 13.4 ElasticForce..... | 303 |

UNIT 7

Newton’s Laws of Motion 308

| | |
|---|-----|
| 14.1 Newton’sFirstLaw | 309 |
| 9.2.2.1 Recognize that inertia is the property of an object that causes it to resist changes in motion. | |
| 14.2 Newton’sSecondLaw..... | 313 |
| 9.2.2.3 Demonstrate that whenever one object exerts force on another, a force equal in magnitude and opposite in direction is exerted by the second object back on the first object. | |
| 14.3 Newton’sThirdLaw..... | 318 |

UNIT 8

Fluid Forces 324

| | |
|-----------------------------|-----|
| 15.1 PressureofFluids..... | 325 |
| 15.2 BuoyancyofFluids | 335 |

UNIT 9

Work and Machines 341

| | |
|--|-----|
| 16.1 Work..... | 342 |
| 16.2 Machines | 348 |
| 9.2.3.2 Calculate and explain the energy, work and power involved in energy transfers in a mechanical system. | |
| 16.3 SimpleMachines | 355 |
| 16.4 CompoundMachines | 365 |

End Quarter 3

UNIT 10

Introduction to Energy 371

| | |
|--|-----|
| 17.1 TypesofEnergy..... | 372 |
| 17.2 FormsofEnergy..... | 380 |
| 9.2.3.1 Identify the energy forms and explain the transfers of energy involved in the operation of common devices. | |
| 17.3 EnergyResources..... | 387 |
| 9.2.4.1.1 Compare local and global environmental and economic advantages and disadvantages of generating electricity using various sources or energy. | |
| 9.2.4.1.2 Describe the trade-offs involved when technological developments impact the way we use energy, natural resources, or synthetic materials. | |

19 Waves

| | |
|---|-----|
| 20.1 CharacteristicsofSound..... | 441 |
| 9.2.3.2.3 Describe how energy is transferred through sound waves and how pitch and loudness are related to wave properties of frequency and amplitude. | |
| 20.2 HearingSound..... | 449 |
| 20.3 UsingSound..... | 455 |

End Quarter 4
